**Note:**

1. VSM can be wired to four independent inputs.
2. VSM available in 120V or 277V Versions.
3. All inputs and all wiring should be line voltage.
4. VSM can be mounted inside of Fixture or in any approved enclosure.
5. If LM2-0-120 wired to 277V use 277 to 120 drop-down transformer.
6. Photosensor contact closures rated up to 277V line voltage output.
7. 2 - 500 foot Candel Adjustment Range.
8. Each channel independent adjustment.
9. Ideal for 2 Level Accurate Day-lighting.
10. VSM can connect to any line voltage circuit on panel with GNX.
