Typical Wiring Diagram

0-10 (--) is internally connected to power NEUTRAL not Class 2

Fixture Control Module FCM1RD Internal Schematic

Note:
1) FCM1RD will turn off all power to Ballast in OFF state
2) FCM1RD shown wired for Induction Fixture
3) FCM1RD can be wired to any 0-10V fixture
4) 0-10 output is not Class 2 and can be wired without seperation
5) Maximum wire size for connector 16GA
