SimpleWorx products use the existing wiring to control lights

SimpleWorx is a revolutionary digital point to points control product for cost-effective On/Off lighting control. 100% money-back guarantee if not satisfied for ANY REASON!

SimpleWorx offers a variety of transmitters and receivers which are super easy to install and the push-button setup is a breeze and shockingly simple!

SimpleWorx is powered by Simple Powerline Communication (SPC™) a rock-solid proven technology which provides reliable one-way control using the 120v wiring that is already in place.
OVERVIEW

It’s simple. SimpleWorx consists of a variety of transmitter and receiver devices: timers, keypads, wire-in switches, fixture type and plug-in modules, which are super easy-to-install and program. Programming is accomplished by pushing a button on each device. One, two, three you’re done!

TIMER

The Digital Astronomical Timer features four user programmed on/off settings, each can be set for: a specific time of day, sunset or sunrise with an offset (before or after). The DAT will also auto-adjust for your locations sunrise/sunset and has an automatic Daylight Saving Time option too. A battery backup ensures your settings are saved if the power goes out.

Key Features
- Four Timer Events: Two On/Off Times
- Event Schedules: Dusk, Dawn (+/- 127 Min) or Specific time
- Determines Sunrise and Sunset daily and adjusts for Daylight Saving Time
- 5 year battery backup
- Simple installation, plugs into any standard outlet
- Remote control On/Off of Linked devices from anywhere in a home
- 5 year warranty

DAT - Digital Astronomical Timer

KEYPAD

The Keypad Transmitter is an in-wall or desktop controller providing control of four groups of SimpleWorx receivers anywhere in your home or office. Each group can have one or multiple receivers. The KPT4 conveniently connects to your home’s existing electrical system through a standard single gang electrical box for simple installation without additional wiring.

Key Features
- Capable of controlling four groups of SWX devices
- Each group may have one or more receivers
- Mounts in a single gang electrical box
- Remote On/Off from anywhere in a home
- Simple press and hold setup
- LED status of group
- 5 year Warranty

KPT4 - Wall Mount Keypad Transmitter
DKPT4 - Desktop Keypad Transmitter

RECEIVERS

The Wall Switch Receiver, Plug-in Module Relay and Fixture modules are remote on/off switches which can be controlled from any SimpleWorx transmitter without the need for control wires. Controlling wire-in or plug-in loads, such as landscape lighting transformers, water features, televisions, small motors, pumps, appliances up to a 15A load or lamps up to 800W has never been simpler.

Key Features
- Controllable from eight Transmitters
- Links to SPC Transmitters in seconds
- Simple installation, replace existing switch or plug in to any grounded 120V outlet
- ON/OFF control of 120V or Contact
- LED indicates status of relay
- Manual button control
- Power failure restore to last state
- 5 Year Warranty
